

Leading Causes of Death, 1900-1998

The tables on the following pages represent the leading causes of death in the death registration area for the period 1900-1932 and the United States for the period 1933-1998. Since the tables were produced at different times and for different publications, the formatting and even the number of leading causes shown differ from one year to the next.

There are specific rules for ranking leading causes of death. These rules are shown in the Technical notes of the final report as well as in the Technical Appendix of Vital Statistics of the United States. The rules for ranking leading causes of death were developed by NCHS and the states around 1950, so that everyone would be identifying the leading causes of death in the same way.

Initially, the procedure for ranking stipulated that the “List of 64 Selected Causes of Death” be used and the following rules applied:

- Omit the group titles “Major cardiovascular-renal diseases” and “Diseases of the cardiovascular system” and the single titles “Symptoms, senility and ill-defined conditions” and “All other infective and parasitic diseases”
- Rank the remaining group titles and single titles, omitting any title appearing under a group title included in the ranking
- Apply this procedure to deaths by age, race, and sex, with the exception of deaths under 1 year of age
- In published tables of rank order, indicate the list of causes of death that have been ranked, and the procedure used

Effective with 1969 data, category titles beginning with “other” or “all other” were dropped from the ranking. The list of causes providing the basis for ranking has changed slightly over the years. A separate cause-of-death ranking for infants was formalized in 1979.

Cause-of-death titles change from time-to-time. This reflects that the classification used to show cause of death and the specific list used for ranking is revised periodically. The classification is revised to incorporate and capture changes in medical knowledge. The revisions, in some instances, do create breaks in the comparability of a cause of death between two years. Other screens provide additional detail about the revisions of the classification and comparability.

Notes:

- 1) The tables for 1900-1940 denote the cause by the titles and codes of the fifth revision. In fact, five revisions of the classification were used during this time period.
- 2) Many of the crude rates have been revised from the original publication to reflect the modification of population data after a later census was conducted.

Table 8. Deaths and death rates for the 10 leading causes of death in specified age groups, by race and sex: United States, 1998

[Rates per 100,000 population in specified group. For explanation of asterisks preceding cause-of-death categories, see Technical notes of NVSR vol 48 (11)]

DEATHS AND DEATH RATES FOR LEADING CAUSES OF DEATH: UNITED STATES, 1949-1957

[Rates per 100,000 population enumerated as of April 1 for 1950 and estimated as of July 1 for all other years]

Rank Order	Cause of death and category numbers of the Sixth Revision of the International Lists	Number	Rate
1950			
	All causes-----	1,452,454	963.8
1	Diseases of heart-----410-433	535,705	355.5
2	Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues-----140-205	210,733	139.8
3	Vascular lesions affecting central nervous system-----330-334	156,751	91,249
4	Accidents-----E800-E962	34,763	60.6
...	Motor vehicle accidents -----E810-E835	56,486	23.1
...	All other accidents -----E800-E802,E840-E962	60,989	37.5
5	Certain diseases of early infancy -----760-776	47,120	40.5
6	Influenza and pneumonia, except pneumonia of newborn-----480-493	33,959	31.3
7	Tuberculosis, all forms -----001-019	30,734	22.5
8	General arteriosclerosis -----450	24,677	20.4
9	Chronic and unspecified nephritis and other renal sclerosis-----592-594	24,419	16.4
10	Diabetes mellitus -----260		16.2
1949			
	All causes-----	1,443,607	971.0
		518,568	
1	Diseases of heart -----410-443		348.8
2	Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues -----140-205	206,325	138.8
3	Vascular lesions affecting central nervous system -----330-334	149,953	100.9
4	Accidents -----E800-E962	90,106	60.6
...	Motor vehicle accidents -----E810-E835	31,701	21.3
...	All other accidents -----E800-E802,E840-E962	58,405	39.3
5	Certain diseases of early infancy -----760-776	44,640	43.2
6	Influenza and pneumonia, except pneumonia of newborn -----480-493	39,100	30.0
7	Tuberculosis, all forms -----001-019	30,426	26.3
8	General arteriosclerosis -----450	25,935	20.5
9	Chronic and unspecified nephritis and other renal sclerosis -----592-594	25,089	17.4
10	Diabetes mellitus -----260		16.9
